

EXERCISE-2

Functional Requirements

The screenshot shows the Azure DevOps interface for the 'Expense Tracker' project. The 'Backlog' view is active, displaying a list of work items for the 'Expense Tracker Team'. The work items are organized by type (Epic, Feature, User Story) and state (New). The right-hand 'Planning' pane shows the team's backlog and three iterations, all of which currently have no work scheduled.

Work Item Type	Title	State
Epic	User Account Management	New
Feature	User Registration	New
User Story	Register with Email and Password	New
Feature	Registered User Login	New
User Story	Login with Valid Credentials	New
Epic	Expense Management	New
Feature	Add Expense Functionality	New
User Story	Create a New Expense Entry	New
Feature	Remove Incorrect Expenses	New

This screenshot shows the same Azure DevOps interface, but with a different set of work items in the backlog. The 'Planning' pane remains the same, showing no work scheduled for any of the iterations.

Work Item Type	Title	State
User Story	Delete an Expense Entry	New
Epic	Expense Visualization	New
Feature	Monthly Expense Summary	New
User Story	Display Monthly Summary	New
Feature	Pie Chart Visualization	New
User Story	Show Expense Distribution in Pie Chart	New
Epic	Budget and Alerts	New
Feature	Budget Setup	New
User Story	Define Monthly Budget	New
